

JEFF LIU

INDUSTRIAL DESIGNER

ABOUT ME

More than 8 years working experience in industrial design field.

I had back-end knowledge and RFQ experience with brand company in Compal. I also had front-end design thinking and co-team working experience in various kind of products in CRE8 design studio.

In Aerocool, I had experience to create a brand called ThunderX3, selling high-end and low profile gaming accessories. Learning how to create a brand and define the road map of the products.

In DELL. Co-team worked with different internal teams and vendors. Had the experience of doing complete project from end to end, and co-work with Taiwan and US team in different time zone is my superiority.

In Amazon Ring. I design concepts and solve issues with cross function teams. Handle the projects from end to end. Co-work with the team in US and other countries. Define the road map of Ring products with ID team.

I have known several skills talent and passion that one looks for in design – attention to detail and also seek for innovation. Also hungers for learning the new information and technologies.
